CONFLICT MINERALS DISCLOSURE

This Form SD of United States Steel Corporation ("U. S. Steel") is filed pursuant to Rule 13p-1 promulgated under the Securities and Exchange Act of 1934, as amended, for the reporting period January 1, 2017, to December 31, 2017.

Rule 13p-1 (the "Rule") requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite, and

wolframite, including their derivatives, which are limited to tantalum, tin, and tungsten (the “Conflict Minerals”). The “Covered Countries” for the purposes of the Rule 13p-1 are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia, and Angola.

The only Conflict Mineral necessary to the functionality or production of U. S. Steel’s products is tin that is used in the manufacture of its tin coated sheet steel. Any other trace elements of Conflict Minerals present in U. S. Steel’s products are the result of scrap steel, procured by U. S. Steel from a scrap or recycled source and used in the manufacture of U. S. Steel’s products.

In making its reasonable country of origin inquiry, U. S. Steel collected questionnaires, certificates of analysis, or conflict minerals statements from all five of its tin suppliers. A review of the documentation received from these suppliers showed that the tin purchased by U. S. Steel did not originate from any countries on the continent of Africa.

Therefore, U. S. Steel has determined in good faith that the Conflict Minerals it purchased in calendar year 2017 that were necessary to the functionality or production of its products and used in the manufacture of its products did not originate in the Covered Countries.
